Sharkey-Issaquena Community Hospital colleagues in colloquial conversations while attending the memorial for the March 23-24 tornado from 2023 (N=2). In person in Rolling Fork, MS. We specifically discussed syphilis concerns and the measles vaccination coverage concerns for the future. This was all in person and did not include any of the visuals beyond the helpful maps included in the COVID/measles/syphilis explanation. The hospital is interested in thinking about how to educate and build community relationships regarding sensitive topics like vaccinations, but resources will be important in the future to help them be able to do the work. We also discussed skin health, specifically related to severe bacterial or fungal infections in the wake of disasters though. Several hospital staff, including the main colleague in this discussion, developed severe MRSA infections in the process of response post-tornado. This kind of skin health and protection needs to be considered for future disaster preparedness.

I also shared the information via word of mouth at my office at work, talking to the staff present here (N=9).

I really want to thank the presenters for the excellent visuals this time!!

Still working on the approval process and internal department logistics for generating facebook content to our department's page.

In March I continued to talk about Heart Health to my staff, family, and church members. Community Health - PIER will be having its annual Shirley Allen Heart Health Walk on Saturday, March 30th in Metcalfe. With this event coming I share some information with my staff, family, and church. Some of the responses were they wanted to start a walking group and change diet plans. These were ongoing conversations.

On March 21st I presented at MVSU at a site visit for their OVW program, a program around domestic violence. I spoke on Domestic Violence within the LGBTQ community. I spoke about mental health and depression.

Posted on social media. People were asking about tanning beds, the best ones in the area etc.

I told them the dangers of skin cancers and explained how I understood tanning, but now realize it was a bad idea. I presently have skin cancer and many commented how sorry they were and would definitely rethink tanning beds.

Also shared with American Legion about the importance of heart screening. I myself had one last month. Many of us are planning on walking at the local park when it warms up a bit.
